

WRAP UP

OPPORTUNITIES

- Facility and resources to develop teaching teams
- New environments and to continue to build excellent teaching practice
- No restrictions on space and ability to build relationships
- Include our students – what do they want?
- Visiting other sites
- Involving the whole community in how to use new spaces
- Do things differently and encourage staff to see themselves as professional learners

CHALLENGES

- Facility and resources to develop teaching teams
- To work better as a group and acknowledge the good work we are doing in our schools
- Remote location – difficult to access resources easily
- Finding time for reflection and taking action
- Get a bargain on the bus passes!
- Managing the ‘fear factor’ and bringing staff along for the ride
- New buildings, same staff (same pedagogy)

THE BIG QUESTIONS

- How do you manage parental expectation?
- How do we create play spaces that allow for scooters etc... and still conform to OHS requirements?
- Is there available research on the use of colour in school environment and the impact on learning?
- What can we do on Monday with the space that we have?
